## Executive Summary

In the 2025 Regular Legislative session, Senate Bill 42 was passed and adopted into State Statute in June of 2025. One of the many things the bill and subsequent law did was require the Children, Youth, and Families Department (CYFD) to submit an annual report that includes data from the previous calendar year on a myriad of child welfare outcomes related to child safety, permanency, and well-being. Section 32A-4-33.2 NMSA 1978, "Creation and Maintenance of Dashboard on Department Website; Annual Report," requires CYFD to create and maintain a public, searchable dashboard on its website while protecting personal identifier information as required by federal and state law. The dashboard will be updated at least quarterly and will include all data reported to the governor and legislature. By February 1 each year, CYFD will submit a report to the governor and legislature with data from the previous twelve months ending December 31.

Consistent with 32A-4-33.2, there are 11 metrics, and all data is disaggregated by age, race, ethnicity, gender, disability status, and geographic location. The report will also be published each year on the CYFD website. The data and narrative contained within this report are consistent with CYFD's child welfare goals related to child abuse and neglect prevention, safety of children, timely permanency, placement and stability, and child and family well-being. It is the mission of CYFD to work across the state's child welfare system to

- nurture the strength and resilience of families;
- partner with children, families, and communities based on trust and transparency; and
- serve by listening and learning from our communities and keeping children, youth and families healthy, safe and thriving.

## Child Welfare Goals

- **Child Abuse and Neglect Prevention:** The goal of CYFD prevention programs are to create a continuum of prevention services and programs that support safer home environments by improving parenting skills, increasing access to mental health, substance, and behavioral health services, and increasing access to early childhood education and care services, as well as improving access to monetary and food assistance programs to keep families intact and to reduce the trauma of removal from the home.
- **Child Safety:** In alignment with federal outcomes under Title IV-B and Title IV-E of the Social Security Act, CYFD works to protect children from abuse and neglect and to maintain their safety at home when appropriate. CYFD conducts safety and risk assessments, works to mitigate safety concerns in the home when possible, and ensures that allegations of child abuse and neglect are properly screened and investigated within required timeframes.
- **Timely Permanency:** When a child cannot be safely maintained in their own home, and must be removed and placed into foster care, CYFD works with the court system, foster care providers, and community partners to ensure children do not linger in foster care for longer than necessary. In alignment with federal outcomes under Title IV-B and Title IV-E of the Social Security Act, CYFD works to ensure children have permanency and stability in their living situations, and that the continuity of their relationships and connections with family, friends, and community are maintained.
- **Placement and Stability:** When a child enters foster care, the child should be placed with a licensed, prepared, and supported foster parent, whether a relative or non-relative. Children require safe, stable placements that meet their needs and offer the most normalized living environment while working toward permanency. Foster parents receive training, skills, and support to care for children in their homes. If a child requires a higher level of therapeutic care, CYFD is responsible for coordinating services and ensuring effective treatment so the child can return to or remain in a foster care home.
- **Child and Family Well-being:** In alignment with federal outcomes under Titles IV-B and IV-E of the Social Security Act, when children and their families are involved with CYFD, it is important that families and foster families have increased skills, knowledge, and resources to meet children's needs. Children should receive individualized educational support

and have access to adequate medical, dental, and mental health care services to address their specific needs.

## Fatalities and Near Fatalities

Section 32A-4-33.2 NMSA 1978, paragraph B (1) Metric: The number of fatalities and near fatalities of children in the custody of the department or as a result of abandonment, abuse or neglect when in the custody of a parent, guardian, custodian or other person.

It is the policy of the Children, Youth and Families Department (CYFD) to ensure that critical incidents involving a child or youth known to the department are tracked and immediately addressed to protect safety and well-being of children/youth, to provide support to all affected individuals, and to review agency systems for opportunities to strengthen policy, training, best case practice, and collaboration through continuous quality improvement.

Tracking and reporting on fatalities and near fatalities are part of CYFD's Critical Incident Review and Reporting process. Critical incidents are defined as "any fatality, near fatality, serious injury, or suicide attempt of children in CYFD custody or of children whose parent or guardian have been involved with CYFD within the last three years. Any 911 call for a child or youth in CYFD custody placed in a hotel, motel, office stay, receiving center stay, or out-of-state congregate care placement." Furthermore, CYFD defines fatality and near fatality as:

- **Fatality:** Death, including suicide, that occurs when a child has sustained either an irreversible cessation of circulatory or respiratory functions; or irreversible cessation of all functions of the entire brain, including the brain stem. A determination of death will be made in accordance with accepted medical standards by a medical doctor.
- **Near Fatality:** An act that, as certified by a physician, including the child's treating physician, placed a child in a serious or critical medical condition. Near fatality may include attempted suicide or a medical intervention necessary to prevent death such as one or more of the following actions:
  - cardiopulmonary resuscitation (CPR);
  - rescue breathing;
  - removal of airway obstruction;
  - intubation;
  - organ failure;
  - administration of medications to stabilize cardiac or respiratory status, or blood pressure (including use of Narcan);
  - intravenous correction of critical electrolytes or blood sugar;
  - any surgical intervention to preserve brain function or prevent blood loss or infection;
  - any invasive monitoring to gauge neurological status; and/or

## Number of investigations as of result of allegations

Section 32A-4-33.2 NMSA 1978, paragraph B (5) Metric: The number of investigations that resulted from the complaints, the number of complaints accepted for investigation and not accepted for investigation and the identified reasons in the aggregate for not investigating a complaint.

At this time, CYFD is working on a solution to review over 30,000 lines of narrative to be able to aggregate information for reporting purposes, including identified reasons for not investigating a complaint. This will be corrected when CYFD moves to its new web based case management information system, Impact in Fall 2026.

## Number of children and cases transferred to Tribal jurisdiction

Section 32A-4-33.2 NMSA 1978, paragraph B (11) Metric: The number of children and cases transferred to the jurisdiction of Indian nations, tribes and pueblos pursuant to the Indian Family Protection Act.

When an Indian tribe has exclusive jurisdiction over a child custody proceeding involving an Indian child who resides or is domiciled within the reservation of the Indian tribe, the Department shall ask the Indian child's tribe if the tribe will accept jurisdiction over the child custody proceedings. If the Indian child's tribe declines, the court retains jurisdiction. If the Indian child's tribe accepts jurisdiction, the court shall transfer child custody proceedings to Tribal court. In 2025, there were no transfers of custody to the Tribe from the state after the ten-day custody hearing.
